PROFESSIONAL EXPERIENCE

Student Videographer (2023-2025)
Boise State University Admissions

- Shot, edited, and scripted videos that gave incoming students an idea of what to expect when they arrived at Boise State.
- Worked with talent on set to make sure they were comfortable and had everything they needed to succeed.
- Created motion graphics for various projects when my coworkers needed them, as I was one of the few people in the office with expertise in programs like After Effects.
- Suggested reform in our underperforming social platforms, which led to healthier analytics and a much less convoluted frontend for new students.

Junior Editor (2022-2023)
New Visual Media

- Animated digital signage for clients like Albertsons with After Effects and Davinci Resolve.
- Regularly jumped around the office to help with various projects and reduce the work load for full-time employees.
- Was often called on to provide assistance whenever a project hit a hitch
